Installation Sheet

KSR6302

Escala Live End | Escala Track

Read these instructions before commencing installation & retain them for future reference.

Available Finishes: Black or White

IP20 240V 16A Max Load

Important Information

It is recommended that this track system is installed by a qualified electrician ensuring the installation complies to current IEE wiring regulations & local building control.
These products are designed for connection to a 240V 50Hz supply.
Any broken or damaged parts should be replaced as soon as possible.
KSR will not accept responsibility for any claims arising from a poor installation.

Important User Advice

Always switch off mains supply before servicing, fitting or replacing lamps.
The KSR track system is suitable for indoor use only and should not be fitted to damp or wet surfaces such as freshly plastered or painted walls.
Never exceed the maximum 16A load.

Installation Procedure

Remove the case top by pulling to expose the terminals. Push the KSR6302 into the end of the Escala track (Fig. I). Secure in place using the locking screw, terminate cables (Please note this is a class I product so must be earthed) and cable grip (Fig. 2). Replace top cover by snapping back into place (Fig. 3).
